

Call for Abstracts

The Norwegian Society of Lifting Technology (NSLT) continues its success with its annual meeting forum for people working with subsea lifting and marine operations!

Present your topic at det Conference:

Subsea Lifting and Marine Operations 2024!

December 3rd-4th at Clarion Hotel Air, Sola, Stavanger, Norway

The Conferences organizers are pleased to invite you to submit an abstract by August 15th 2024 for consideration for the Subsea Lifting and Marine Operations Conference 2024.

Suggestions for Abstract topics can be seen on the next page. Abstracts are welcome on other subjects that authors believe would be of interest to the audience.

The aim of the conference is to improve the understanding of operational issues and to connect design analysis specialists, people responsible for selection of concepts and the installation contractors.

Knowledge ensures a good economy!

NSLT is often informed that subsea lifting and marine operations have exceeded the cost budget by several million NOKs due to lack of knowledge within relevant disciplines. Often the costs are exceeded because the operation duration is longer than planned. The conference will therefore focus on the various phases of a subsea installation operation and will be to present and exchange knowledge about critical topics of marine operations involving subsea lifts.

Call for Abstracts

How to submit your Abstract

If you would like to present an Abstract, please send your Abstract which shows the presentation idea with short description (200 – 300 words) to:
stene.kristiansen@qualitynorway.no

If you do not have any specific paper to submit, but would like to suggest a topic, please present your idea to us by **August 15th**.

If, after evaluation by the Committee, your Abstract is accepted, you will receive a confirmation from us by **August 30th**. After approval, the finished presentation (in a PPT or PDF format, including information regarding the use of animations, videos or specific presentation software) shall be delivered at least **one week** before the conference for the final review by the Committee.

Please note the presentation should not be commercial, however one commercial slide is accepted.

Other subjects

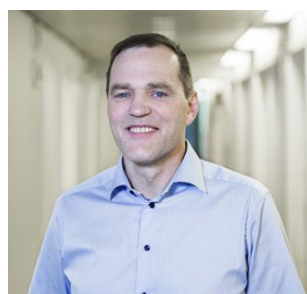

Abstracts are welcome on other subjects that authors believe would be of interest to the offshore crane and lifting community.

Target audience:

- Engineers in companies engaged in design/operation analysis of subsea structures and marine contractor companies
- Personnel in subsea engineering companies and other companies performing design of subsea structures and other equipment and tools used in an operation
- Competent persons for offshore cranes and lifting appliances
- Suppliers of specialised tools and equipment for subsea lifting operations
- Authorities and others formulating recommendations or evaluation criteria and undertakes control functions
- Warranty surveyors
- Operational responsible personnel in energy companies

Topics:

- Lifting Equipment / Crane Technology
- New Technology and research
- Project experience
- Future projects
- Marine Operations and logistics
